Huseynov Farid

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Java Software Engineer with over a year of experience in internal web service development using Java 21 and the Spring ecosystem. Demonstrated ability to rapidly adapt to complex architectures and contribute effectively to high-traffic ecosystems, gained through engineering experience at Rakuten and Dunya School. Possesses a strong understanding of OOP, clean code principles, and relational databases.

EDUCATION

Bachelor of Information Technologies | 2023-2027
Azerbaijan State University of Economics, Baku
- Faculty: Digital Economy

SKILLS

Hard
- **Programming Languages:** Java, C#, JavaScript
- **Frameworks:** Spring Boot, Spring Security, Spring MVC, Spring Data (JPA and Hibernate), OAuth2, ASP.NET Core, Entity Framework Core.
- **Databases:** PostgreSQL, SQLite, MongoDB, TiDB
- **Tools:** Git & GitHub, Linux, WSL, Docker & Kubernetes, JWT
- **Languages spoken:** English (C1), Russian (Native), Japanese (N5 - Basic)

Soft
- Communication, Teamwork, Problem-solving
- Critical thinking, Leadership, Creativity
- Decision-making, Adaptability

PROJECTS

DuckVest | Investment Brokerage Platform
Java 21+, Spring Boot, React, PostgreSQL
- Developed a Spring Boot backend simulating a stockbrokerage platform with trading, user portfolios, and real-time market data integration.

MyGarden | Smart Irrigation Decision Support System
Express.js, React, MongoDB
- Led the team and worked on both idea development and backend implementation of MyGarden MVP, which won 3rd place at the “Yaşıl Qarabağ” hackathon.

DIGITALTURKK

WORK EXPERIENCE

Software Engineer Intern | Feb 2026 – Apr 2026
Rakuten Ichiba Division | Tokyo, Japan (Remote)

- *Worked with Kubernetes-based R-Cloud to run and deploy containerized microservices.*
- *Used Prometheus and Grafana to monitor application metrics and investigate performance issues.*
- *Worked with Bitbucket CI/CD pipelines and staging deployments.*
- *Worked with TiDB and Redis for data storage, caching, and query optimization.*
- *Participated in code reviews, Asakai meetings, and Agile team practices with an international engineering team.*

Backend Engineer Intern | May 2025 – Nov 2025
Aeronexus LLC | Baku, Azerbaijan

- *Developed an asynchronous task-processing service.*
- *Monitored services and analyzed logs using Grafana dashboards and Grafana Loki.*
- *Replaced the inefficient data-access logic with a custom repository query and optimized JOIN-based data retrieval, significantly reducing the number of database queries executed per request.*
- *Discovered excessive database queries in an existing feature during integration testing and traced the issue to repeated entity fetching, identifying an N+1 query pattern that generated more than 100 queries per request. The solution was subsequently implemented by a mid-level developer.*

Developer Intern | Oct 2024 – Mar 2025
Khazar University Dunya School | Sumqayit, Azerbaijan

- *Designed and implemented RESTful APIs with ASP.NET to manage core educational data, including courses, students, and class schedules.*
- *Implemented JWT for secure user authentication across internal web services.*
- *Collaborated on the development of an end-to-end Teacher Dashboard.*

Web Developer Intern | Apr 2024 – Oct 2024
Caspian Spirit LLC | Baku, Azerbaijan

- *Integrated a chatbot, allowing users to query approved company information through a controlled backend API without direct database access.*
- *Identified an N+1 query problem in a new feature developed by a middle-level engineer through testing and database query analysis.*
- *Proposed a custom SQL query in the data repository layer, replacing inefficient entity fetching and eliminating the N+1 query issue.*
- *Designed pagination and filtering for new Entities.*

Web Developer Intern | Sep 2023 – Mar 2024
RRAeroparts LLC | Baku, Azerbaijan

- *Maintained and improved the company website using React.js.*
- *Identified and fixed an issue in the contact form that prevented submitted messages from being delivered to the company's email inbox.*
- *Integrated and tested REST APIs and third-party services.*
- *Worked with PostgreSQL databases to retrieve, update, and manage application data.*
- *Used Git and collaborated with middle developers.*
